

Infor CloudSuite Industrial (SyteLine)

Stay productive

What if you could deliver on time, every time? What if you could get your products to market quicker and do a better job of matching up supply with demand? No matter how complex your supply chain is, you need to be able to respond faster to change, reduce excess inventory, and cut costs. Most importantly, you've got to give customers what you promised them, at the time you promised it. You can deliver all this and more with an ERP solution that helps improve productivity—both in the office and on the shop floor. Infor CloudSuite™ Industrial (SyteLine®) is that solution.

Get experience built in

Developed by experts in discrete manufacturing, Infor CloudSuite Industrial (SyteLine) has more than 25 years of experience built in. That means you can be confident you've got the tools you need to get the job done, and that you're getting it all from an experienced support team.

With Infor CloudSuite Industrial, you get a solution that meets your specific needs with role-based information, a personalized user interface, and familiar tools and common navigation. You'll find it much easier to deal with daily disruptions from employees, equipment, and suppliers because manufacturing best practices and process flows are embedded within Infor CloudSuite Industrial.

And with the ability to define your own business processes, you'll finally have an ERP solution that lets you make your system your own, and that gives you the tools and support you need to be successful.

Personalize your ERP system, focus on your work, and be confident you've got the right software and support team for the job.

Make better decisions, faster

What if you could know the exact delivery date when an order is placed? What if you could order what you need at the time you need it? And what if you knew in advance how an unplanned order would affect your other customer orders, capacity, material requirements, and cost of manufacturing?

Meet your unique needs

With Infor CloudSuite Industrial, you can do all that and more. You'll no longer have to deal with unreliable, outdated processes for monitoring customer demand, scheduling delivery dates, and tracking resources. You can see everything you need to see at the time it happens, so you can make better decisions, faster. No matter the size, scope, or scale of your company, Infor CloudSuite Industrial can be configured to meet your company's operational needs.

You'll be able to:

- **Make it your own**—Fine-tune your ERP system on the fly and personalize the solution to create a tool that helps solve your day-to-day business challenges, quickly and efficiently.
- **Get back to work**—When an unexpected order suddenly arrives on your production floor, adjust your current schedule so you can deliver all your orders on time, without interruption.
- **Be confident**—You'll know you've got the tools you need to get the job done. And you'll know you're getting them from an experienced team that has what it takes, knows what to do, and knows manufacturing.

Operate more efficiently

Whether you are a mid-size manufacturer with mixed-mode processes or an enterprise-size OEM with a complex MTO and ETO business model, Infor CloudSuite Industrial can help you operate more efficiently.

Get industry-specific functionality

With Infor CloudSuite Industrial, you get:

Advanced planning and scheduling (APS)—Find out if you have the materials, people, machines, and tools you need to manufacture an item, while continually monitoring demand as it occurs. Before you commit to an unplanned order, you can see the ripple effect it will have on your schedule and your shop floor, so you can reset expectations with existing customers. If a machine goes down, you can update production schedules quickly. As a result, you'll be able to boost productivity, improve order accuracy, and increase on-time delivery—all things that can help keep your customers happy.

Complex product configuration—Manage the guided selling process of configured components, and ensure that configuration details pass directly to the production environment so there is no confusion on capable-to-promise dates or what to manufacture.

Materials and inventory management—Would you like to reduce your inventory, while avoiding shortages? With Infor CloudSuite Industrial, you can buy what you need, when you need it. You can also do away with side systems, which are difficult and costly to maintain. Plus, you can shorten order entry time, eliminate duplicate orders, cut down on costly data entry errors, and make sure data is consistent.

Customer management—Manage all aspects of your relationships with customers and prospects, from estimating to invoicing.

Microsoft®-based system—With familiar tools and common navigation, you can save time on implementation, customization, and training. Plus, your IT staff will be able to focus on strategic projects rather than tactical issues. Not only that, you'll be able to draw from a huge talent pool that knows how to work with a Microsoft-based system.

Application event system—Customize your system without modifying your source code, and improve your workflow in the process. When you upgrade your system, you'll automatically upgrade your customizations at the same time.

Educational tools—Get your Infor CloudSuite Industrial users up to speed quickly with Infor Campus, an Internet-based learning solution, and Infor EPAK (Enterprise Performance Accelerator Kit), a development platform for rapidly creating documentation, training, and performance support materials. Not only will you be able to speed up implementation, you'll reduce the burden on your IT staff.

Role-based information—Get all the information you need to do your job on a single screen. For example, if you're a production planner, you can get data that helps you manage planned vs. actual production, unplanned scrap by reason, resource utilization, and on-time completion.

Better user experiences—Personalize the user interface to fit your particular industry, team, or even an individual user. You can add, remove, and edit fields, labels, and complete screens without having to call on IT for help. You'll get the information you need, when you need it, with easy-to-use forms. Plus, you'll be able to reduce or eliminate costly modifications to personalized features when you upgrade your system.

Get quick results

Complexity and competition continue to increase in discrete manufacturing. With Infor CloudSuite Industrial (SyteLine), you can personalize your enterprise resource planning system, focus on your work, and be confident you've got the right software and support team for the job.

Benefits:

- Go to market faster.
- Deliver products on time.
- Do more with less.
- Reduce the impact of change.
